For the Kentucky Gaz tle. THE EXECUTION. Twos a melaneholy sight. I never saw The fieudish hangman's eychalls glain With such nurelenting thirst for blook.

With such intelepting thirst for blood.
Much like a demon from the gates of bell.
With nwful aspect and a countehance of sin,
As if rejoicing that he soon should burl
Into the depths of dark eternity
Another inmate there to dwell in endless woe;
ife mounts the eart, adjusts the halter round
The trendling victim's neck, and binds his ryes;
Then dismonuts, and bids the carman move,—
So tenacious is man to life, the victim clines So tenacious is man to life, the victim chings Unto the cort fill it by force recedes away: And awful! then he swings into the empty air! Electic-like it passes through the crowd:
Convulsions seize his frame, and oft and many Struggles vain he makes to bose the fatal hal-

ENGLAND.

ENGLAND.

In the House of Lords, on the 4th of July, the bill to meliorate the criminal code had its second reading, on notion of Lord Denman.—On the 5th a bill to place graduates of Durbam College and the London University on the same footing with those of Oxford and Cambridge, with regard to practising ut law, was read a second time, on motion of Lord Brougham.

In the Commons, June 30, Mr. Spring Rice brought forward the budget. He stated his inability to propose my farther reduction of the ensuing year.

Mr. Hume attributed the causes of the unonetry crisis, in the first place, to the Chan-cellor of the Exchequer in contracting the 25,-000,000l. loan; and, in the next place, to the conduct of the Bank of England after the loan

had been contracted.

Mr. Wallice said that all the mischief had been brought about by the iniquitous caurt of bank directors, who sought to be exempted from the enquiry which was to be made into all their brother joint stock banks in the test of the country. That body had speculated as traders till they drove the specie out of the country, and they now wanted to bring it back at the expense of the people. They had ruined the United States of America.

Mr. Clay considered that the commercial distresses of the country were comparatively passed over the country.

The intelligence brought by the Thbernia, says the Liverpool Curonicle of the 8th, wis we repoice to say, of a character which leads us to believe that the worst has been witnessed in America. Although neatters had not taken a decided torm for the better, yet they were improving gradually. Specie is gradually finding its way back to England. The George Washington bas on board, we understand, about half a millian of dollars. The Hiberma brought about thirty thousand, and the London prelief ship Quebec ten thousand. This of it brought about inity tronsand, and the London packet ship Quebecten thousand. FRANCE.

There is no news of importance from France. The Paris papers are much occupied with the maniferous acquital of Gen. De Rigny, by a court marn. It, from accusations of committee and insuborder ation brought against him by Marshal Clausel, the commander of the French

Army in Algiess.
It appears that during the famous retreat for Constantingple, De Rigny remonstrated against the haste and disorder with which the retreat was conducted, which was the cowardice and insubordination complained of. De Rigny proved a conclusive case of reckless baste in the retreat as directed by the marshal; and shower retreat as directed by the marsial; and showed the great waste of men, who were muchle to keep pace with the unnecessary rapidity of the fiving array. The court seemed to hold by their acquittal, that he was justified in remon-

The speculators say that this is awing to the num-ber of moneyed people about to quit Pacis, throwing their noney into market for invest-ment. The ministerialises, nowever, take the

redit for it.

Marshal Clausel is said to be strongly hum oled by the late verdict on Gen. De Rigny, and to have expressed to some of his friends a deter-mination to quit France and throw up his employment and rank. GERMANY.

FRANKFORT, June 30. Samething sinister is inteparing in the Diet.
The Count of Monen Bellinghausen, the present minister of Austria, has made visits to the Grand Duke of Baden at Carlstone, and to the King of Wurten-burgh at Stotgard. Prince Metternich himself is going to Munich. I have every reason to behave that some ordinance is meditated against the rights of constitutional meditated again-i the rights of constitutions chanders in this country. The petty and independent sovernights of these constitutional states have this time, however, made resistance states have this time, however, made resistance the object to reactionary measures not demanded by the circumstances of the time. They are by no means inclined to adapt the strained policy of the new King of Hanover, whose oath of allegiance to the Queen of England, by the bye, has roused and burt the pride of the German courts predigiously. The kings of the rest of Europe, they say here, were but primes of the Holy Roman Empire. Are the tables so threed that a German king may sit and do obeisance as an English peer? What will be the policy of King Ernest of Hanover, with respect to the Prussian commercial union? The peet to the Prussian commercial union? The question becomes more complicated by the fact of a treaty of commerce insuring reciprocal advantages having been concluded between Hanover and Austria a few days previous to King William's death. If this be adhered to, which it must, Hanover can only enter the Prussian league in conjunction with Austria.

20th of June, the number or cases have been from 360 to 370, and of deaths from 250 to 260. Although the people are in a state of consternation, the city is free from disturbances. In the hospitals the best disposition are made.

The ciergy were carrying the saints through the

streets with the greatest pomp. The latest accounts from Palermo say that influence cases of childera had occurred in that rity, and the board of health had aircacly de livered hills accordingly. It is an extraordi many circumstance at Naples that oranges have disent to four or five granot a piece, because this is the only fruit that is considered who esome. On the contrary, the finest strawberries and trerries, which would be paid for in guineus at Petersburg and Loudon, are to be had almost for nothing, which is an enormous loss to the country people, for the enlitivation of strawber ries is carried on there on a great scale, the plantations covering vast tracts of land.

Upwards of 500 buildings were destroyed; many of them however, were native buts. Several large buildings, however, were burnt, which contained much valuable property. The loss is estimated at over 1,000,000 rupees. Among the buildings hunt was the Orphan School.

Stimereck on the Lakes .- The Buffalo Star of Thursday states, on the authority of a pas-senger by the steamboar Bunker Hill, that the brig North Carolina was cap-ized forty udles bryond Mackinaw, and it is supposed that every croun our hoard perished. Besides her crew, there was on board a large number of passen-

exports during the same period of time being to conduct it thither, which reasonable request was percentagily tem-est.

The following from the Findlay (Hancock county, Ohio) Courier, of August 3d, is certainly the most remarkable phenomenon we remember ever having read of. The country, for miles round, presents nearly a dead level.

Had not Mr. Wade been extremely notive in atlempting to escape, he would have perished almost instantly. At the time of the water gushing forth, a continued roaring ea-sued similar to a loud clap of thunder, which shook the earth violently for several hours.— By an application of a fire-brand to the water, it took fire and hunt like Alchohol; the blaze struck fire feet above the surface of the well, and at the same time burning the puncheons that lay on the top of the well. The water still continues to boil.

A writer in the New York Courier states that the paved streets of that city emerace an extent of two hand hed and fifty miles.

All alarm is past and a regular quarantine is observed by mos persons aside from Turks. Some of them also, it is said, begin to take some precautions. Their religious belief that whatever is to hap-

"It becomes my painful duty to inform you of the death of Frederick Bange, jr. who was shot by a soldier on the night of the 23d ult. in the public road a tew leagues below this city. The circumstances of this melancholy occurrece, as they have been communicated to me, are as follows:—It appears that the deceased had been at the month of the river, and was returning home about 10 o'clock at night, in company with Col. Bradburn, Capt. Patherson, and a Mr. Bruno Lesano, when they were commanded to halt by a guard of solilers concealed in the bushes on the road side, for the purpose it is said, of looking out for robbers. The party all stopped immediately, with the exception of Mr. Bange, whose horse, it is supposed,

O'l'm ready for either."—Ja;nes Rnowles, of Point Judith, in the last war, lived in a a exposed situation, near the ocean, and never event to bed without having his gun well charged by his side. One night there was a violent thursday. ler gust, which shook the house to its foundader gist, which shook the house to its follida-tion. "Mushand, linsband, screamed the wife, get up, the British have landed or the day of judgment has come, and I do'nt know which." "By gosh," said Knowles, springing up and seizing the musker, "I'm ready for either."

How to choose a good Husband .- Girls -when you see a young man of medest, respectful, retiring manners, with impretending, yet noble independence of mind, of amiable and pions disposition, not given topride or vanity--such a one will make a good husband, for he will be the same to his wife after marriage that he vas before.

When you see a young man who would ake a wife for the value of herself, -- for her beauties of mind and purity of heart, and not for the dazzle of wealth, that man will make a good husband, for his affection will never lessen, and years will lint serve to strengthen his attachment, and pen new fountains in the heart, which hall nurmur sweetly on to the ocean of ontinual happiness.

Never make money an object of marriage; if you do, depend upon it, as a bal-lance for that good, you will get a bad husband-one whose love and amhition will soon be irretrieveably engrossed in reckless schemes of speculation, to the utter disregard and neglect of the kinder sympathes of nature and more social cuamls of Ballycoollen, and on the same night can, girls, for he will make a good hustwenty-five cows, on the lands of Buzzardstown, belonging to A. > Respect to the ladies .- In a late communication in one of the city papers, we found the following true sentiments:--

really most fond of the society of the la. dies, who cherish for them a sincere respeet, nav reverence, are seldom the most popular with the sex. Men of more a surance, whose tongnes are lightly hung, who make words supply the place of ideas, and place compliments in the room of sentiments, are the favorites. A true respect for women leads to respectful action, towards them, and respectful is usually distant action, and this great distance is mistaken by them for neglect and want of interest.'

Of the truth of the above, no one who mingles in society is ignorant-and we must confess that we have never so fely our respect for the female sex to diminish, as when we have seen them wasting their smiles and attention upon the n-e

BRIBERY OATH.—It is true that the test of an oath should be resorted to at our elections. The successful candidates were required by our conscientions fathers, who framed the Coordinates of the care of the c constitution of our State, to take an oath bet for entering on the duties of legislation, that they had neither treated nor given bribes for votos, nor, caused the same to be done in any manner or shape whatever. The tionest hearts of that day could not believe that the open, barefaced bribery of the present times would ever creep or rather stalk into our elections,—There are yet, it must be supposed, honest There are y t, it must be supposed, honest members sufficient in our Legislature, to guard agains; this growing evil which is so loudly complained of in other States, and begins to show itself in some parts of our State to un alarming extent:—the lives of our citizens are taken with impunity in the struggle of hired ruffians. A notice in a London paper of the shameful squandering of money by the Bank of the United States is most humiliating to the once proud spirit of our citizens. It is painful to even touch on this subject. The Legislature of each State should take all menns in their power to guard the elective franchise.

And seemed in worship to the gods, To wend it's mystic way.

My soul grew sad, and all below Seem'd fading with the day. My vision fled, I sigh'd to know If all was living clay! Methinks those shining meteors That 'luminate the sky, Are all celestial messengers
To floot aloft on high. And, like the glance of woman's eyes,

Seem hrighting as we gaze;
Whilst admiration quickly flies
To find a way to please:
Hence romance calls it heaven above, With bucs as bright as they, And stricken swains when venting love, Will swear by earth and sea.

So all appears by Heaven's decree, Boyond the reach of man;
The mind's absorb'd, the eye can't see— So pure, I cease to scan. Past ten o'clock, and all is still, Save breezes murmuring by— All—all combines the mind to filt

And force n bitter sigh. Adien! ye bost of hevenly light—
Ye glimmering gems of Heaven!
It's now past twelve o'elock at night,
My optic vision's riven; I'll seek repose in yonder eot,

From the Trenton, N. J. Emporium. Now, when we present to our country readers-and to the people every where within our reach-a series of facts like the following,

I. The great political contests of the last six years, has been really nothing more nor less than a contest between the People and the Bank Mo

nopolists—
Why we know that our readers have only to recur to the history of the past, with which they are familiar, to see that it is so. They remember well, how the United States Bank rallied the whole Whig party to a man under its banners; they know how it bought up papers—how many thousands it expended for electioneering purposes; they remember that the President of that Bank denounced the President of the United States as "a felon;" if ey remember how ocked up its hooks from the investigating committee of Congress—how it charged the Government apwards of one hundred and fifty thousand dollars for sending n bill of exchange across the Whig party fought for the Bank-ay, "when heir legs were smitten off, e'en fought upon the sumps." They remember now that the sumps." They remember now that same party got it a new charter in Pennsylvanis—and how they still hug it as the forlorn hope of their hearts. The People know all this; and the Whigs may palnyer, and sophisticate, and quibble, until they are as grey as Norway rats, but they never can destroy the facts or the legitimate conclusions that follows from them.

speculators and merchans.

They see things as they are. Second, buying fewer sources of information, they collect and digest, and arrange the facts of the case more thoroughly—remember them better, and apply them more sensibly and accurately to the case. A lawyer with Blackstone in his head, and the statutes at his fingers cnd, is a better taw-yer than one who has a thousand volumes on his shelf that he never read; and a man perfect-

Once more, we assert:
3. That Mr. Van Buren has not done any act to forfeit the confidence of the People, who elected

The people, who closely observe all the movements and measures of the Executive, know it to he true. They know that the Whigs have not even pretended to point out such an act.—
They know, too, that the Whigs themselves, when he was elected, cried out, "welt, give him a fair trial;" and they see that, now, at the hidding of the Banks, they are ready to

LOOK AT 'TOTHER SIDE. - There are facts there, too, that the People know

1. They know that the Banks and Corporations last six years.

That they have flooded the country with paper and locked up the specie in their vaults, or driven it out of circulation. That they have expanded the credit system until it has brought ruin upon thousands. That they are now en-deavoring to send it off to England, so that it may never more interfere with heir circula-tion. That almost every Whig corporation has profited by the experiment, and issued their shin plasters until they are as thick as the frogs

dollar of money.

2 - They know that the Banks and Corporations have done this voluntarily—for the purposes of sain to themselves—and that they are exclusively the gainers by it.

For there is not a Bank Note affoat, or a Corporation Ticket, for which the Banks and Corporation Ticket,

portations are not receiving six per cent. inter-est. They have issued them in loans—they charge interest upon these lonns—they pay no interest to the holders of the paper. They are living and getting rich, hy supplying the country with their paper upon interest, while that paper uself will not pass for the value it bears upon its face, or command the cash it promises, on demand, to pay. And the people know that these Banks, in their reckless career, not only leaved and bundreds. these Banks, in their reckless career, not only loaned out all their own capital, and hundreds of millions of their paper besides, but that they loaned out, for their own private advantage, the forty millions of the People's money which had been deposited for safe keeping in their vaults, and when it was demanded for distribution among the people, had nothing, or would give nothing, but their irredeemable notes in payment. The people knownlithis—and know it welt. They have examined, investigated, and are satisfied about it.

3. The people know that this early, and causeless, and factious, crusade against the Administration, has for its single object the support of these Banks—the approbation of their measures—and the consolidation and perpetuity of their power.

There is no other enribly cause for it. No There is no other earning cause for it. Nobody etse has any possible interest in putting down the Administration. Nobody but the Banks can be profited by it. No other object can be truly assigned. IT IS SIX PER CENT AGAINST THE LIBERTIES OF THE COUNTRY, The campaign of "EXCLUSIVE PRIVILEGES," AGAINST THE INDUSTRY OF THE PEOPLE. FICTI-TIOUS CREDIT AGAINST HONEST

From the N. J. Truc American.

The Whigs have been driven to their last shift. They opened the campaign with the announcement that Mr. Biddle and his Banks had achieved "an everlasting victory" over "the Specie Humbug" and "the Benton Mint Draps." That the Hard Money experiments are the statement of the benton the best of the benton the best of the benton the best of the ment was done up. That the hard money party were prostrate. And that nothing now remained for them to do hut just walk their can-didntes over the course into Congress—charter a new United States Bank, and lay the refractory Democracy forever at the feet of the money power.

A few broadsides from the Democratic press

tering tale." And having been literally driven out of the field of fair and manly argumer -with the loss of their whole battering train of manufactured facts' and invented sophisms, and their temper into the bargain—they are now busily engaged at their old trick of throwing dust in the eyes of the l'eople-unking up false issues-circulating unfounded charges against the Administration-and attempting mislead the public mind . Now, this whole sy tem of tactice, is founded an a grand mistake a mistake which the anistocratic party ha made over and over again in times past-an will make over and over again in time to come The mistake is this - they believe the great mass the mistake is this—they believe the great masses of the people ignorant, and imbecile—incapable of investigation, and ensity guilled. You henr nothing more frequently in the month of a Bank Whig Monopolist, than such phrases as "the ignorant classes"—"the unthinking classes"—"the unenlightened classes." In Wall street and Walnut street, among the great leaders of the party, it is n settled article of faith, that "the country neonle know nothing." This that "the country people know nothing," This the secret of that strange infatuation which has ever pervaded that party; this is the reas on they are now engaged in attempting to throv upon the Administration the censure which he longs to their own mad and fraudulent exper ment of an irredeemable paper currency—the ns a party. They confidently believed, six years ago, that the people could be bought -The Bank tried it-but, in spite of their bribe-ry, General Jackson vetoed the Bank. They believed, four years ago, that the people could be frightened—they brought A PANIC, and A PRESSURE upon the country—BIJT THE PEOPLE SUSTAINED THE PRESIDENT. They now as confidently believe the people can be deceived; THEY ARE TRYING THE EXPERIMENT, AND THEY WILL BE AGAIN MISTAKEN. Strange as it will sound in the ears of the manapoly leaders, we assert .- that the reasoning, thinking, investi Atlantic, and making two entries in its books.

They remember the punic and bankruptey of 1832, how the Bank produced it, and how the better politicians—better informed upon all better politicians -- better informed upon al political questions-and absolutely understand the state of things, the causes which have pro

ly slang of the day, who has treasured up only er of both parties will admit, because the well known facts of the case prove it. Who does any thing.

"The London Standard, a leading tory organ, on the eve of the British parliamentary elections, urges its friends to be iberal with their money for the purpose of carrying members of their way of thinking, and holds up the Bank of the United States as a bright example for their imitation: "that institution," adds the Standard, "having, in its contest with General Jackson, expended a million and a half of money upon a single general election! orinciples of the times, is a better politician than the whose cranian is running over with the parsoundly rated by the standard for their parsimony, and are reproached for suffering themselves to be outdone by the Bank of the United States. Circumstances have made it impossible that these measures should be perfected in the course of the present session; but we cherish the hope that the care and deliberation which have been so carnestly bestowed upon them will not have been in vain, and will lead to their being hereafter matured and carried into effect with general concurrence, and with a sure prospect of promoting the welfare and happiness of the people.

Alarming reports as to Sir Robert Peel's health.—The London papers have delicately alluded, during the past week, to the state of the Right Honorable Baronct's health. Yesterday, it was eurrently reported in Liverpool, and, apparently on very good authority, that lie had been given up by his medical attendants. His disorder was, at first, supposed to be sciatica, a rheumatic affection of the hip joint, and he went to Buxton. There his complaint came on with great violence, and proved to be a lumber abseess, for which it is said he has been operated on,, and which will either suddenly, or gradually but certainly, be fatal to him. Medical menagree, that, if he has this complaint upon him, he can never again enter upon parliamentary duties. ACCIDENT ON THE BALTIMORE AND WASHcars which left Baltimore at 9 o'clock on Sat-urday morning, proceeded within three miles and a half of Washington, when the flange of one of the wheels of the locomotive engine struck the end of a rail projecting about half an inch out of its proper place, and got off the track. The locomotive ran about thirty yards in the sad, when the extetree broke and fell over in a gulley three or four feet deep, the haggage car running on she tender, and instantly crushing it to atoms. The two large cars containing the passengers were driven against the baggage car, but very fortunately no persen in them was injured. The only one burt was a fireman named Harman, who was thrown from the engine where it fell, and was burnt by the coals which flew over him. The engineers und conductors had time to leap from the cars efore the locomotive turned over.

There were about fifty passengers in the train among them the Hon. J. A. Pearce, of Maryhand, and the Hon. W. Terney, of Tennesser, members of Congress; R. S. Coxe, Esq. and family of Washington, and Col. W. Niles and family of Baltimore. The accident fortunatefamily of Baltimore. The accident fortunately occurred on a part of the road which passes over a plain, or the consequences might have een more serious. As it was, the shock was o slightly felt that most of the passengers were totally ignorant of the danger they had escaped, until the sudden stoppage of the cars caused them to look out upon the overturned engine Washington in hacks-ib.

They only become thoroughly known in Europe in 1776; and the memorable declaration of the 4th of July reached France at the close of the samo!

BEAUTIFUL EXTRACT.—A thousand years hence (for I must indulge a few thoughts) perhaps in less, America may be what Europe is now. The innocence of her character that won the hearts of nll nations in her favor, may sound like a romance, and her inimitable virtue as if it had never been. The ruins of that liberty, for which thousands hled, may just furnish ma terials for a village tale; or extort a sigh from rustic sensibility, while the fashionables of that day, enveloped in dissipation, shall deride the rinciples and deny the fact.
When we contemplate the fall of empires

To Mechanics

THE undersigned is charged with the duty of employing mechanics to finish the State House and other public buildings at Little Rock, in the State of Arkansas. Between 30 and 40 thousand dollars is on hand for that

The carpentering work and the plastering and rough easting will consitute the two principal items of expense in completing the public buildings. There is yet a portion of brick work to be done, worth probably, three or four thousand dollars. The laddings are to be

thousand dollars. The laddings are to be painted in the best order. A large partion yet to be covered with tin. And the Square, three hundred feet on each side, is to be enclosed with an iron paling or fence.

The undersigned expects to purchase all the necessary materials at Louisville or Cincinnutian take them with him to Little Rock on his return in the fall; at which time he expects those who engage to do the work or any portion of it to accompany him. of it to accompany him.

Little Rock, the place where this work is to articles in his line, such as Little Rock, the place where this work is to be done, is the permanent seat of government of the new State of Arkansas. It is a fine situation, and a flourishing place, laid out for a good large city, and only wanting mechanics to improve rapidly. It is situated on the south side of the Arkansas river, on a high bluff bank, about 300 miles from the mouth of sand river; and is a point that can be renched by steambouts the greater part of the year. It is not only a high and bandsome situation, but is well watered and esteemed healthy. The latiwell watered and esteemed healthy. The late tude is about thirty-five.

The undersigned feels authorized in saying that there will be creeted within the next twn years, at the City of Little Rock, two large banking establishments—one for the Hank of banking establishments—one for the flatik of the State of Arkansas, now commencing oper, crations, and one offer for the Real Estate Bank, lately chartered, and to be heated at that place. Both banks have branches, and as they have been chartered for a great number of years, there is little doubt but suitable and pernament buildings will be erected for each.

The general government, by her agent, ha The general government, by her agent, has purchased a site for an Arsenal, adjoining the city of Little Rock, upon which, it is sail, many large buildings of brick is to be erected. In addition to all this, the undersigned has personal knowledge of divers inhividuals, citizens, who would put up good large buildings of brick if there were a good supply of mechanics in the country.

Itis believed that mechanics who wish to emigrate, would alo well to move to Arkansas within the next six or eight months. Besides finding plenty of work to do there, they will find the prices invariably high. We have had orders to Fortune's Home.

GRAND CONSOLIDATED LOTTERY,
For the benefit of the State Treasury, Del.

College and Common Schools,

Extra Class No. 8, for 1837. ooked for in Arkansas for some years to com We have bud no Banks there to tempt us with their loans to engage beyond our own means in will speculation. The prices of Arkansus are us high, if not much higher, at this time than the prices of Kentucky, and as money will be increased by the making of banks in Arknusss, it cannot be expected that the prices there will come down, when all admit that the present prices of this country are too high, and must be lowered. Mechanics who have done well, during the high prices here, will continu o do well by engigrating to Arkansas.

The undersigned intends to give the work of the public buildings to mechanics who will ac-campany him to Little Rock in the full, prefer-ring first, those who have families, provided, they take their faudles along; and provided, also, that they be soler men who can be refield on and their charges reasonable.

Individuals wishing to contract will comminicate with the undersigned, on the subject by letter, directed to Danville, Kentucky, where he will be, the greater part of his time, till the first day of October next. In their communi-cations, they will please furnish a bill of prices for the work they are willing to undertake. Carpenters can say they will work by the Louisville printed prices, more or less, as they may make their bid. Bricklayers will say what will be their charge for making and laying, and what for laying only. And in like manuer others will give a bill of prices.

Merhanics who know themselves to be good workmen, and of good character, and who are willing to engigrate would do well to visit the undersigned, if convenient, and have a personal interview with him.

It will be expected that those who get a contract, will take with them a sufficient number 30,000 and 1s! 10,000 dols! 6,000 dolls! 3,140 time, and that they will be ready to leave by the first of October
